Epump Ltd

Efficient, Economical Pumping Solutions

**Pump Engineering
With a Difference**

The Epump Difference

The Right Pump For Every Application

With over thirty years experience, **EPUMP** has gained extensive knowledge of pipe flow and the application and troubleshooting of pumping equipment in the following industries:

- Chemical & Pharmaceutical
- Water and Waste
- Food Manufacture
- Building Services
- General Factory Services

Our vision is to give the best possible engineered pump solution based on efficiency and life cycle costing. Some of the pumps we supply are described below.

CDR PUMPS LTD

EPUMP are official technical sales agents for the CDR range of very competitive chemical process pumps in the North East of England and Yorkshire. This includes magnetic drive and mechanically sealed centrifugal pumps for hazardous corrosive, toxic, pungent and flammable liquids.

Pumps are available in a wide range of materials to suit most applications.

This includes stainless steel, Hastelloy C, and pumps lined with PFA, ETFE, Polypropylene and PVDF.

Solid non metallic pumps are also available.

ASHTON Air Operated Double Diaphragm Pumps

Manufactured from Polypropylene, PVDF, Acetal, Stainless Steel, Cast Iron and Aluminium with a full range of diaphragm materials.

ASHTON Pumps are volumetrically efficient and of modern design—easy to maintain with easy access air valve and Atex certification.

WL GORE™ ONE-UP® PTFE pump diaphragms are available which simply last longer. These provide a dramatic improvement in service life and are considerably stronger than their competitors, with greater flex life.

LUTZ—Drum and Container Emptying Pumps

For almost 50 years **LUTZ** have concentrated on manufacturing drum and container emptying pumps.

Available for both thick and thin liquids in polypropylene, aluminium and stainless steel these can provide a versatile, economical solution to liquid transfer.

A full range of accessories is available including strainers, brackets, drum adaptors, and flow meters which can be provided for accurate batch transfer with good accuracy.

Hygienic Pumps

EPUMP are also technical sales agents for Bestpump Ltd. who are long established, dedicated hygienic engineers. A complete range of hygienic pumps is offered including:

KECOL air operated drum and container transfer pumps for food and general industrial use.

For transferring thick and thin liquids—including difficult to pump liquids such as tomato paste.

Available for conventional drums & containers or tailor made to suit your requirements.

WRIGHT TRA10 and TRA 20 series of 3A approved sanitary circumferential piston pumps for gentle handling of viscous products.

PACKO single and multistage centrifugal pumps for low viscosity liquids.

CESCO magnetic traps, grates, plates and chutes for removal of metallic solids from product.
